TECHNICAL SKILLS

Frontend

- React
- TypeScript
- JavaScript
- HTML & CSS
- Tailwind CSS
- React Router

Backend

- Node.js, Express.js
- RESTful API Development
- Authentication & Authorization (JWT)
- Password Security (bcrypt)
- Middleware Design

Database

- PostgreSQL
- SQL Queries & Database Design
- Database Relationships
- CRUD Operations
- Data Modeling

Developer Tools

- Git & GitHub
- npm
- VS Code
- Postman API Testing
- Environment Configuration (.env)

Additional Skills

- Full-Stack Application Development
- API Integration
- Debugging & Problem Solving
- Responsive UI/UX Implementation
- Agile Development Workflow
- Axios, Vite, Railway
- Neon PostgreSQL, Vercel

EDUCATION

Bachelor of Science (Hons.) Agriculture – Soil Science

University of Agriculture, Faisalabad

2020 – 2024

PROFILE SUMMARY

Full Stack Developer specializing in React, TypeScript, Node.js, Express, and PostgreSQL. Experienced in building and deploying production-ready web applications with authentication, REST APIs, responsive UI, modern cloud platforms, and scalable backend systems.

PROJECTS

ShopHub – Full Stack E-Commerce Platform

React | TypeScript | Node.js | Express | PostgreSQL

- Developed a full-stack e-commerce platform with authentication, cart, wishlist, product reviews, and an admin dashboard.
- Implemented JWT authentication, role-based access, and protected REST API routes across products, orders, wishlist, and reviews.
- Built category and price filtering, stock-aware inventory UI, a persistent cart, and order status tracking for customers.

GitHub: github.com/khushnoodahmad890-cloud/ShopHub

Spotify Clone – Music Streaming Platform

React | TypeScript | Node.js | PostgreSQL

- Developed a Spotify-inspired music streaming application with playlist management, a drag-to-reorder queue, and a responsive UI.
- Implemented JWT authentication, protected routes, and a user profile page with avatar, bio, and password management.
- Built a custom music player with keyboard shortcuts, volume/mute control, and a synced lyrics display.
- Connected the frontend to a PostgreSQL-backed REST API and deployed the application online.

Airbnb Clone – Property Rental Platform

React | TypeScript | Node.js | Express | PostgreSQL

- Built a full-stack property rental platform with real user accounts, bookings, and host listings, inspired by Airbnb.
- Implemented JWT authentication and date-based booking availability, preventing double-booked properties with server-side conflict checks.
- Added a favorites system, property reviews & ratings, and a "Become a Host" flow for user-created listings.
- Designed a mobile-first, responsive layout with dynamic property listings, search/filtering, and client-side routing.

Restaurant Website

React • TypeScript • CSS

- Developed a fully responsive restaurant website with online ordering (cart & checkout), table reservations, and customer reviews.
- Built an admin dashboard to manage reservations, orders, menu items, and reviews.
- Created reusable components for menus, featured dishes, and contact sections, optimized for desktop, tablet, and mobile.
